DON'T SAY IT. DO IT.

Saying we're the best will never make us the best. This is why we show our intentions through the work we do—committing without compromise to protecting the men and women who work in the world's most dangerous environments. Continuously researching, testing, and innovating to better our technologies and elevate our standards, we relentlessly work to build the most effective gear possible. We only look forward toward improvement and refuse to back down to the challenges we face. Every day, like the men and women we're dedicated to protecting, we work until we've done our absolute best. And, like you, we will always **KEEP GOING®**.

MILITARY APPROVALS

MASSIF® PRODUCTS ARE AUTHORIZED BY EVERY BRANCH OF THE U.S. MILITARY

Additional approvals are always in the works, so please check with us for the latest information.

U.S. ARMY - ARMY NATIONAL GUARD

- Elements™ (FREE IWOL) Jacket and Pant are certified and approved by PEO Soldier for Aviators and Combat Vehicle Crewmen. NSNs available
- Army Combat Shirt (ACS) is certified and approved by PEO Soldier for wear in combat. NSNs are available
- Flamestretch®, HotJohns®, and Cool Knit® products are approved per Army reg 95-1

U.S. AIR FORCE - AIR NATIONAL GUARD

- Safe-To-Fly: Massif® Fire and Ice™ Layering System - Elements™ Jacket and Pant CWAS with Battleshield X® fabric featuring Gore® FR stretch technology; Massif® Flamestretch®; HotJohns®; and Cool Knit®. NSNs available
- Safe-To-Fly: Army Combat Shirt (ACS) for helicopter and fixed-wing (non-ejection seat) aircrew. NSNs available
- Elements Jacket and Pant approved for AF ground operators through the Airman Battle System-Ground (ABS-G) program
- FREE IWOL Jacket & Pants per AFCENT and MAJCOM programs
- USAF Letter of Approval Flame Resistant (FR) Certification: Flamestretch® Pullover, Pant, Uni, and Beanie; HotJohns® Crew, Pullover, Balaclava, and Bottom; Cool Knit® T-Shirt, Crew and Bottom; Inversion Lightweight and Midweight T-shirt, Crew, and Bottom; Advanced Quarter Zip Combat Shirt; Breeze™ Boxers
- 2-Piece Flight Suit - AFSOC Approved
- Safe-To-Fly: (Interim) Women's 2-Piece Flight Suit for helicopter and fixed-wing, (non-ejection seat), aircrew
- Safe-To-Fly: Locator Intermediate Cold Weather Flight Glove (touchscreen compatible)
- Non-FR combat shirts authorized for USAF & ANG Security Forces personnel

U.S. MARINE CORPS AND U.S. NAVY

NAVAIR State of the Art Survival Items (SOASI) approved product list allows helicopter and fixed-wing (non-ejection seat) aircrew to wear the following Massif garments:

- Elements™ Pant CWAS (All Aircrew - All Platforms including ejection seat aircraft)
- NAVAIR Elements™ Jacket and Pant
- 2-Piece Flight Suit - NAVAIR
- Advanced Quarter Zip Combat Shirt

- National Business Center, Aviation Management Directorate (AMD), has approved Flamestretch®, HotJohns®, and Cool Knit® products for wear under a flight suit or under the yellow shirt and green pants. Safe-To-Fly: Army Combat Shirt (ACS) for helicopter and fixed-wing (non-ejection seat) aircrew. NSNs available.
- WLFF PPE Garment System has approved Nitro Knit.
- CBP Air and Marine Operations (AMO) has approved Cool Knit®, Advanced Quarter Zip Combat Shirt, Arc Pant, Hellman Combat Pant, Elements™ NAVAIR Jacket & Pant, and 2-Piece Flight Suit.

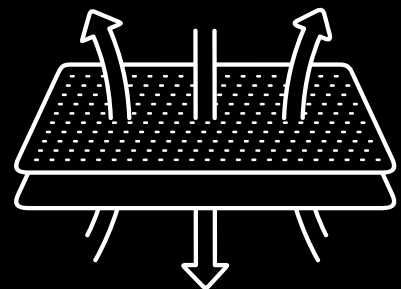

SABA[®]

TECHNOLOGY FABRIC

Massif[®] worked closely with their Los Angeles based mill to combine the protection of the highest performing softshell materials with the breathability of the most dynamic insulative fabrics. The result: SABA[®], a revolutionary fabric that has distinct properties unlike any other in the industry. As the most advanced, next generation of insulative fabric, SABA[®] offers unheard of breathability, limitless layering options, and excellent foul weather protection.

SABA[®] fabric is a two-layer laminate system that combines proprietary FR processes with unique knit structures. The advanced fabric is lightweight with supreme breathability and an advanced Durable Water Repellent (DWR) treatment. Those attributes make it perfect for under armor applications and advanced layering systems. SABA[®] has excellent softness and hand thanks to a proprietary knitted FR nylon face. This enables easy donning and doffing while providing quiet operation during the most crucial moments. Inherent FR backer fabric provides next-to-skin comfort, multi-directional stretch, and superior moisture-management properties.

- Two-layer laminate system fabric
- FR protection with supreme breathability
- Durable Water Repellent (DWR) treatment
- Next-to-skin comfort

ALTITUDE™ JACKET AND PANT

Purpose: A three-season jacket that's a must-have when you're on the go in a cool to cold environment.

Where We Used SABA®: The Main body material for both the jacket and pant are entirely made of SABA®.

Why: The mixture of premium breathability and next to skin comfort make SABA® an ideal fabric for boosting warmth without holding onto moisture.

CALDERA™ WIND SHIRT

Purpose: Unparalleled protection for operators working in aircraft with open windows or doors.

Where We Used SABA®: The sleeve and deltoid area of the combat shirt.

Why: Adds a level of wind protection to areas of garment not covered by armor while keeping it light and movable.

RAINIER COLD WEATHER COMBAT SHIRT

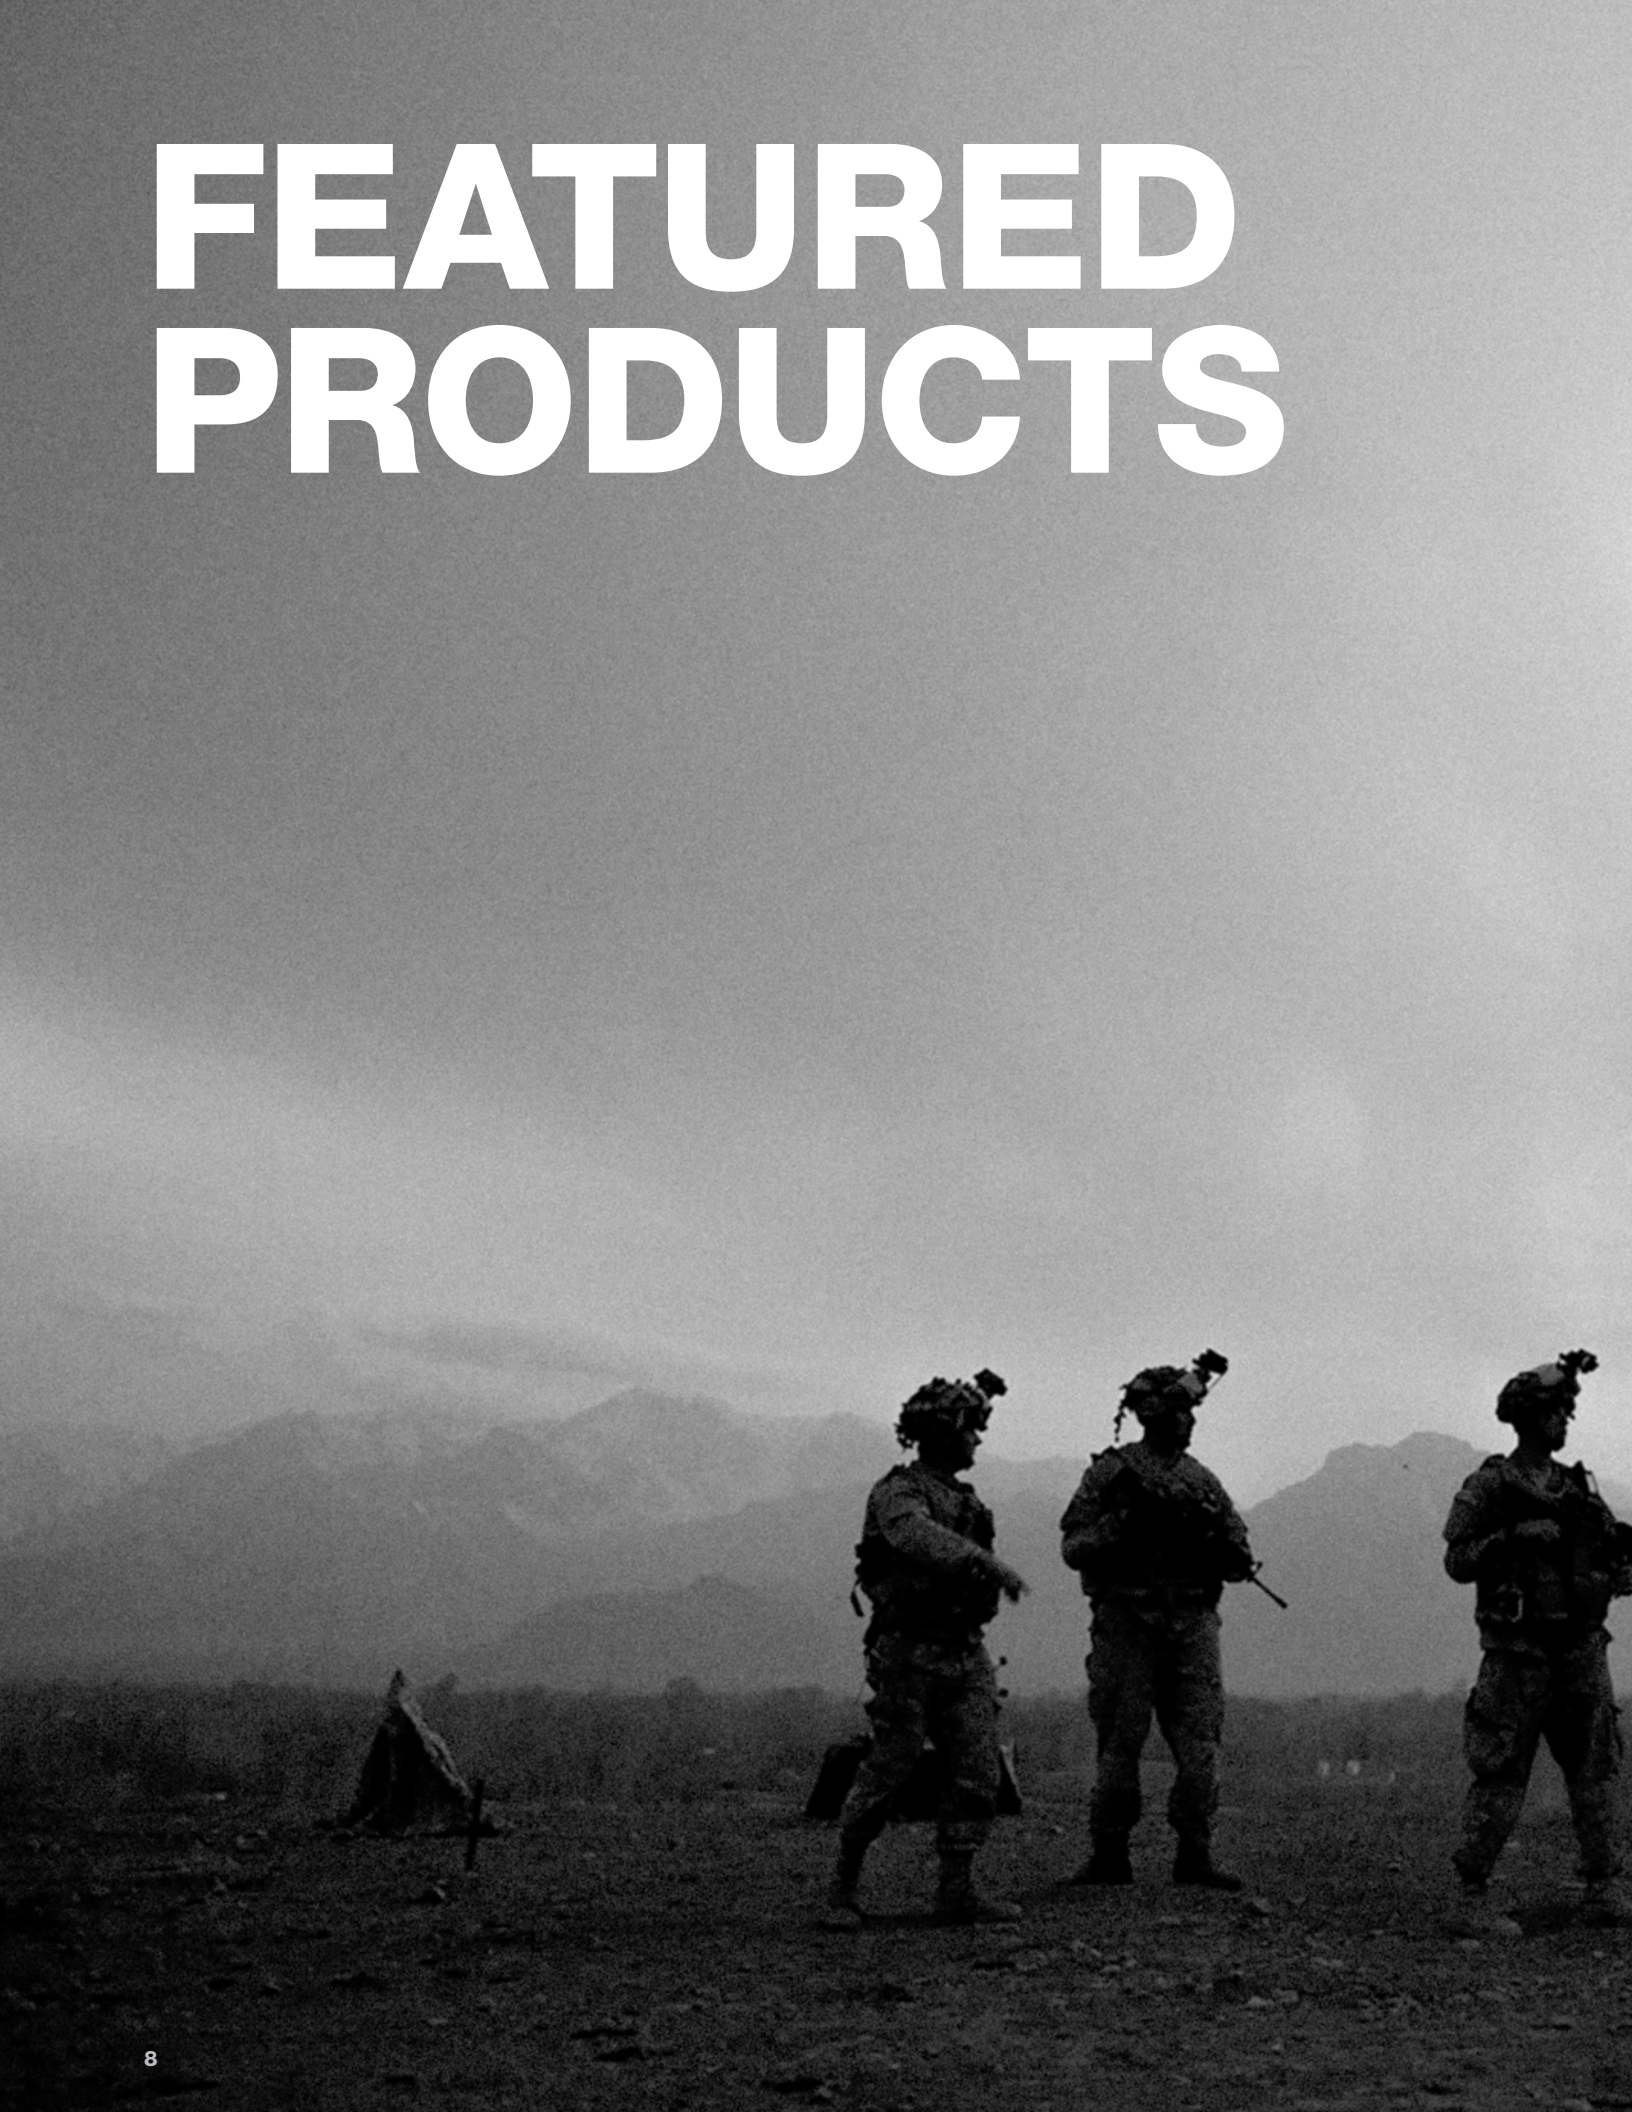

Purpose: To take our proven combat shirt design into the coldest environments.

Where We Used SABA®: In the torso.

Why: Breathable enough to move moisture under armor while maintaining core body temperature.

INVERSION

LIGHTWEIGHT AND MIDWEIGHT BASE LAYER

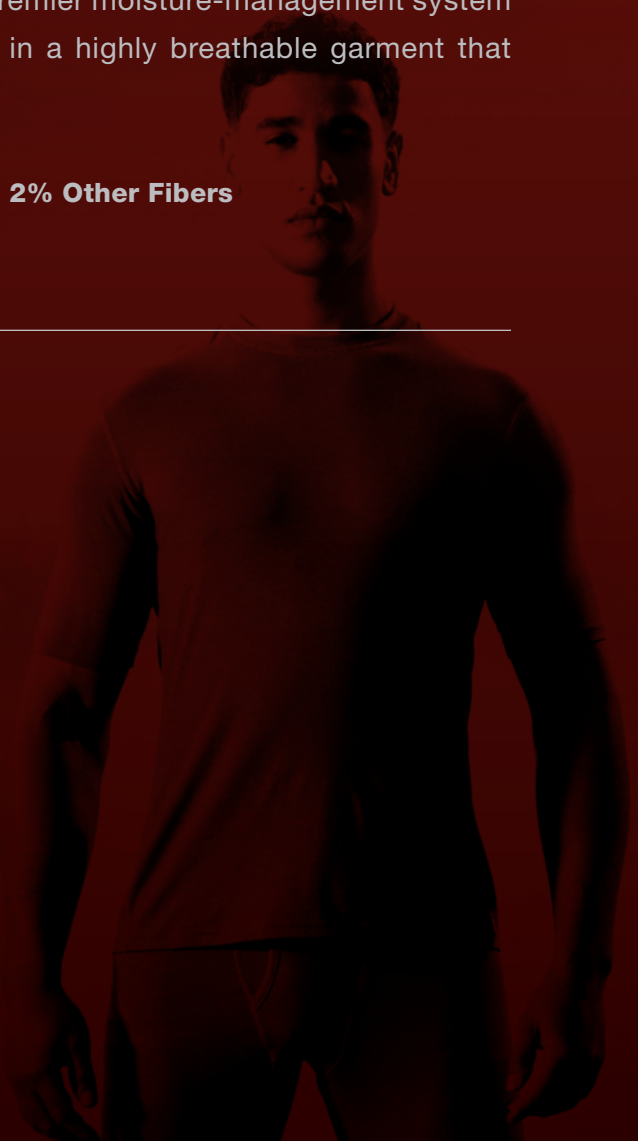

Straightforward. Sharp. Incredibly comfortable. A few cycles of wear, and you'll be touting your new favorite base layer. The Massif Inversion base layers are engineered with an advanced tri-blend yarn system that provides unparalleled performance across multiple environments. This special blend plus the addition of spandex generates an improved range of motion, superior comfort, and extraordinary recovery for after-wash durability with no unsightly "bag outs." Sweat is rapidly wicked away from your body through a premier moisture-management system scientifically engineered for fast dry times. This results in a highly breathable garment that allows you to fully focus on your mission.

FABRIC: 49% Modacrylic, 39% Lyocell, 10% Para-aramid, 2% Other Fibers

COLORS: Tan 499, Tan 498, Black and Navy

FEATURES:

- **Outstanding stretch and recovery**
- **Premium next-to-skin comfort**
- **Synthetic blend delivers uncompromising moisture management**
- **Ultra-fast dry times**
- **Women's Fit Available**

WOMEN'S FIT

BEING A WOMAN-OWNED BUSINESS, WE ARE PARTICULARLY PROUD TO DESIGN AND DEVELOP GARMENTS FOR WOMEN WHO SERVE.

The days of having to wear ill-fitting uniforms are over. We have tailored garments for a woman's fit along with the performance attributes explicit to those needs. We made critical adjustments throughout, including preferred placement of garment features to maximize functionality and appropriate chest and waist form.

MASSIF[®] **LAYERING** **SYSTEM**

EVERY LAYER HAS A PURPOSE.

UNDERWEAR (page 29)

Our underwear is streamlined with an athletic fit that is both comfortable and supportive. Made with soft, four-way stretch and ultra-breathable fabrics that are also compressible.

LIGHTWEIGHT BASE LAYER (page 29)

With advanced moisture management capabilities and softness, our garments offer stretch, comfort, breathability and insulation in form-fitting modern designs. The next-to-skin layer retains shape over time with aggressive wicking characteristics and is highly compressible. We use flat seam construction for comfortable layering.

MIDWEIGHT BASE LAYER (page 31)

For insulation and moisture management in cold climates. Our midweight is stretchy, comfortable and easily layers over lightweight layers and under outer layers. They can also be used as a stand-alone garment. They have outstanding wicking properties with breathability while keeping you warm and dry when sweating. We use flat seam construction for comfortable layering.

HEAVYWEIGHT BASE LAYER (page 33)

Our warmest layering option is designed as an insulating layer worn over our lightweight layers, midweight layers, or both. The fabric is stretchy and breathable, but traps heat to keep a person warm and comfortable. We use flat seam construction for comfortable layering.

WINDBREAKER (page 35)

Our windbreaker is designed to resist wind and light rain. It is lightweight and constructed of a durable material, includes a hood, and easily folds inside its own pocket making it easy to stow.

INSULATIVE LAYER (page 35)

Our insulation layers allow you to adjust to different outside temperatures and activity levels to maintain a comfortable core body temperature. These highly versatile garments can be worn on either active or static missions.

SOFTSHELL (page 36)

Massif® softshells offer exceptional breathability, durability, and a fantastic warmth-to-weight ratio. They are designed for a person wanting warmth and protection in a performance form. They are highly water resistant and versatile outer layers that fit easily over base layers and uniforms but won't bunch under hardshells, packs, or body armor.

BOXER BRIEFS

Why put on just any underwear when you can wear the world's most comfortable boxer briefs? Our Breeze™ briefs have a streamlined, athletic fit that is both comfortable and supportive. We've extensively tested our boxers to prove they won't bunch, ride up, or chafe – whether you're sitting in a cockpit or on the move.

BREEZE™ BOXER BRIEF

Colors: **TAN**
#MUND00001

- 4-way stretch
- Excellent moisture management
- Lightweight
- Highly compressible
- Flat seam construction

KEY			
	Flame Resistant	Non-Flame Resistant	No Melt No Drip

INVERSION LIGHTWEIGHT BASE LAYER

A well-dialed kit can be worthless with a poorly developed base layer that holds onto moisture or creates stress on the skin. With this in mind, we built the Inversion Lightweight and Midweight Base Layers with superior moisture management and next to skin comfort. Our proprietary synthetic fabric excels at stretch and recovery, which an active soldier expects and needs from a base layer, wash after wash.

COOL KNIT® LIGHTWEIGHT BASE LAYER

The perfect base layer, Cool Knit aggressively wicks sweat away from your skin, keeping you cool and preventing saturation. The lightweight four-way stretch fabric retains its shape over time, and is highly compressible for easy stuffing when you're living out of a pack. Constructed with DuPont™ Nomex® brand fiber — the first flame-resistant fiber selected for use in military uniforms.

COMBAT SHIRTS AND PANTS

Massif® specializes in advanced FR technology for your most challenging missions. This is a key reason we have fielded millions of combat shirts. Every time we design a new piece of apparel, we have you and your purpose in mind. Our goal is to make sure you are protected and comfortable with the most innovative, performance-based combat apparel on the market so you can face every challenge with confidence.
