BUILT FOR
THE
MISSION®

MYSTERY RANCH builds the best load-bearing equipment in the world. We build for a different kind of customer, for folks who inspire us, and men and women with a job to do. We build with the best materials available and the most durable construction methods that exist so that you know our gear will support your mission whether it's on the front line, the fire line, the cleanest line or the steepest line.

We don't cut corners. Every pack that we build is designed with you in mind from function and fit to design and comfort. When every item that goes in your pack is a necessity, we want you to be efficient, effective, and most important, safe. We want to be sure that you can get it done, whatever your mission may be.

MYSTERY RANCH® – BUILT FOR THE MISSION®

CERTIFICATIONS

Berry Compliant

All products in this catalog are in compliance with the Berry Amendment (10 U.S.C. 2533a).

WARRANTY & REPAIRS

MYSTERY RANCH designs and manufactures packs for the job that needs to get done, supporting customers who rely on our packs to get home at the end of the day. Our Warranty guarantees everything we build against defects in materials and craftsmanship for the practical lifetime of the product. We will happily offer repair or replacement for issues with materials or craftsmanship. Damage due to normal wear and tear or misuse can be repaired for a reasonable charge.

PATENTS

Most MYSTERY RANCH products are covered by US and Foreign Patents, and other Patents Pending.

US Patents include:

US 6,626,342 B1; US 7,673,777 B2; US 8,381,956 B2; US 8,561,866 B2; US 8,950,644 B2; US 8,348,114 B2;
US 8,579,171 B2; US 9,173,473 B2; US 9,271,559 B2; US 8,162,194 B2 ; US 8,955,792 B2

MATERIALS & TECHNOLOGY

CORDURA®

500D and 1000D CORDURA®

Built of custom spec'd 500D and 1000D CORDURA® with Teflon® and PU coatings for maximum durability, UV, and weather protection.

YKK®

YKK® Zippers

#8 and #10 zippers are used to provide long-haul durability.

IR Compliant Zippers

Coyote, water-repellent YKK® zippers

FUTURAYOKE®

Futura Yoke System

The patented MYSTERY RANCH Futura Yoke system enables you to macro adjust the torso length and is a crucial piece of the structure of the pack.

BVS

Bolstered Ventilation and Stability

The BVS system increases stability of the pack over armor

ASSAULT

This line of packs is designed to be the last word in assault packs. Engineered for quick access, comfort, and loaded with features, these packs are built for short and extended missions.

ASAP

3 DAY ASSAULT

Coyote

Black

Foliage

Multicam

Weight: 1.4 kg (3 lbs)
Vol: 20 L (1208 cu-in)
Size: S M/L XL
Berry Compliant

For the shortest of missions, the ASAP is our smallest assault pack. Its 3-ZIP design allows quick access to the bag's interior and can easily carry a radio. Inside are multiple hydration configuration options.

Coyote

Multicam

Weight: 2 kg (4.4 lbs)
Vol: 33 L (2038 cu-in)
Size: S M/L XL
Berry Compliant

We've taken the classic design of the 3 DAY ASSAULT and streamlined the exterior by removing and updating features, making it the best pack for versatility and mobility. PALS webbing on exterior accommodates MOLLE accessories and inside, it has a PALS webbing panel for radio mounts plus detail pockets and hydration sleeves and the side compression straps minimize bulk. The 3-ZIP design provides easy access to sustenance gear, ammo, IFAKs and tactical radios.

KOMODO DRAGON

ASSAULT

Coyote

Multicam

Weight: 2.1 kg (4.7 lbs)

Vol: 38 L (2288 cu-in)

Size: S M/L XL

Berry Compliant 

The KOMODO DRAGON is a slightly larger version of our 3 Day Assault for extended time in the field. PALS webbing on exterior accommodates MOLLE accessories and inside, it has a PALS webbing panel for radio mounts plus detail pockets and hydration sleeves. The 3-ZIP design provides easy access to sustainment gear, ammo, IFAKs and tactical radios. The waist belt stows away when not in use.

BLACKJACK 50

Coyote

Multicam

Weight: 3.3 kg (7.2 lbs)

Vol: 50 L (3051 cu-in)

Size: S M L XL XXL

Berry Compliant 

The BLACKJACK 50 is designed after the new standard-issue packs for USSOCOM, the SPEAR ASSAULT. It features a lightweight, full carbon frame, Dyneema CORDURA® laminate, IR-compliant zippers, and lightweight bolsters. It is a 3051 cu-in, top-loading pack with two external pockets that each have internal, mesh pockets. The pack has full-length zippers on each side for fast access to the main compartment.

SATL

Coyote

Multicam

Weight: 3.1 kg (6.8 lbs)

Vol: 56 L (3500 cu-in)

Size: S M L XL XXL

Berry Compliant 

The standard-issue assault pack for SOCOM for over a decade. This pack features an internal harness compartment secures radio to the body panel to minimize shifting and a comfortable, Redirect waist belt for effective weight transfer.

MOUNTAIN RUCK

6500

Coyote

Multicam

Coyote

Multicam

Weight: 3.5 kg (7.8 lbs)

Vol: 86 L (5248 cu-in)

Size: S M L XL XXL

Berry Compliant

The MOUNTAIN RUCK is our interpretation of the classic military ruck design. It combines the desirable shape of the original ALICE pack with the superior fit, quality and function of a MYSTERY RANCH product. The outside pockets keep gear separated and organized and the interior has PALS webbing on the back panel for attaching MOLLE accessories. The MOUNTAIN RUCK is compatible with our DAYPACK LID accessory.

Weight: 4.5 kg (9.9 lbs)

Vol: 106 L (6500 cu-in)

Size: S M L XL XXL

Berry Compliant

A tactical expedition pack with room for everything for extended RECCE missions or bulkier items, the 6500 is our classic top loading tactical expedition pack. One of our most popular packs, this classic top-loading design features our Speedzip™ sleeping bag compartment on the bottom and a removable Day Pack lid. Based on the NICE Frame system, this pack can carry 70 pounds in comfort and will stabilize loads surpassing 100 pounds. A side zipper allows quick access to the internal contents of bag.

BLACKJACK 50

Coyote

Multicam

- VELCRO® on lid for identification and patches
- Removable lid with zippered pocket
- PALS webbing on exterior and interior accommodates MOLLE accessories
- IR-Compliant, water repellent YKK® zippers with toggles for easy use with gloved hands
- Two external zippered pockets with PALS webbing on the face have an interior detail pocket
- Bottom and side compression straps
- Autolock buckles prevent slippage
- Top-loading shroud and two, full-length side zipper access to interior
- Urethane coated zipper port at top of body panel opens from either side for antennae, cables, and/or hydration
- Fully adjustable Futura yoke telescopes to fit any torso length
- Internal sleeves and ports integrate up to three hydration reservoirs
- Military Light Frame consists of a matrix of carbon stays and shock-absorbing Dyneema CORDURA® laminate
- BVS – Bolstered Ventilation and Stability system – allows for a stable, secure fit over body armor and can be easily removed
- Side water bottle or rifle butt pockets
- Redirect waist belt system secures in a natural, forward pull direction that requires less effort to tighten

BLACKJACK 80

Coyote

Multicam

- VELCRO® on lid for identification and patches
- Removable lid with zippered pockets has 2" straps that enable it to be used as a bolt/E&E waist pack or shoulder sling
- Upper external zippered pocket with PALS webbing on the face has an interior detail pocket
- PALS webbing on exterior and interior accommodates MOLLE accessories
- IR-Compliant, water repellent YKK® zippers with toggles for easy use with gloved hands
- Three external zippered pockets
- Bottom and side compression straps
- Autolock buckles prevent slippage
- Top-loading shroud and two, full-length side zipper access to interior
- Urethane coated zipper port at top of body panel opens from either side for antennae, cables, and/or hydration
- Fully adjustable Futura yoke telescopes to fit any torso length
- Internal sleeves and port integrate up to three hydration reservoirs
- Military Light Frame consists of a matrix of carbon stays and shock-absorbing Dyneema CORDURA® laminate
- BVS – Bolstered Ventilation and Stability system – allows for a stable, secure fit over body armor and can be easily removed
- Side water bottle or rifle butt pockets with pass throughs for skis or other long items
- Redirect waist belt system secures in a natural, forward pull direction that requires less effort to tighten

LOAD HAULING

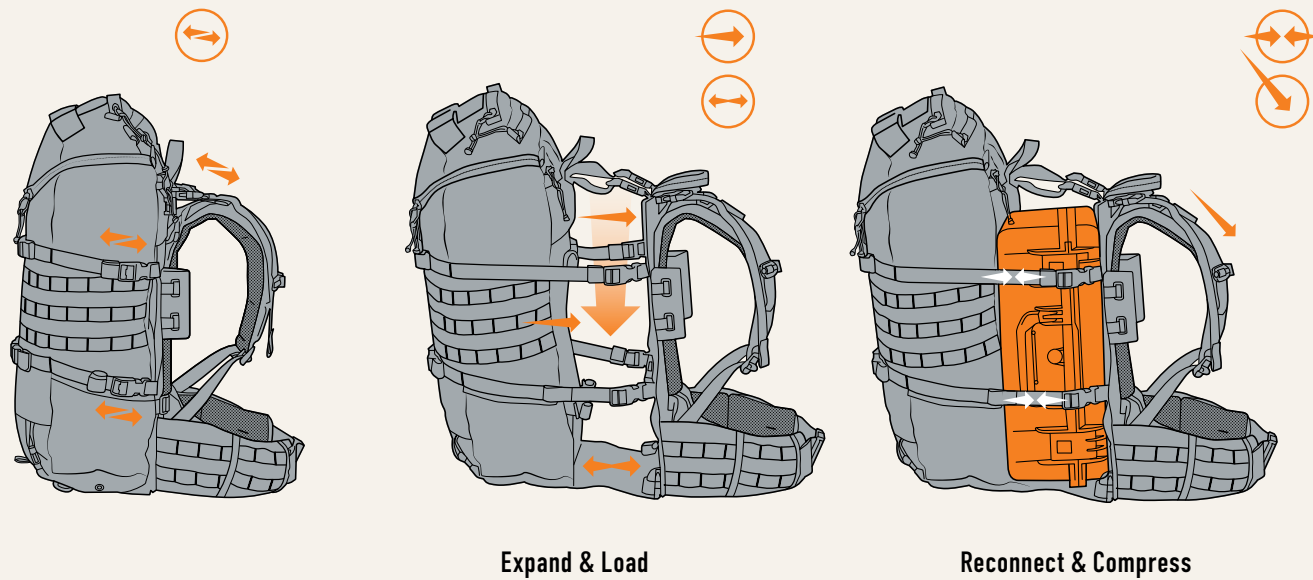

Load Carriage is the cornerstone of our design philosophy; it's at the core of what makes MYSTERY RANCH packs different. We specialize in building packs that adapt to awkward and changeable loads. Optimizing the load is our specialty.

[BACK TO TOP](#)

Go Ahead, Bring More!

OVERLOAD SYSTEM

The **OVERLOAD**® features patented **MYSTERY RANCH** technology that increases capacity. It provides functional expandability via a load sling between the pack and the frame, allowing you to put the bulk of the weight closest to your back for optimal comfort. This feature allows for securing sniper and crew-served weapons, Pelican cases, additional gear, or any other awkwardly shaped load between the frame and the bag without decreasing pack capacity for mission essentials or sustainment gear. The grippy, high-abrasion Hypalon fabric on the OVERLOAD® stabilizes the load for secure, comfortable carry over long distances.

Expand & Load

Reconnect & Compress

OVERLOAD®

Multicam

OVERLOAD with Pelican case

Coyote

Weapon compression straps

Weight: 3.5 kg (7.8 lbs)

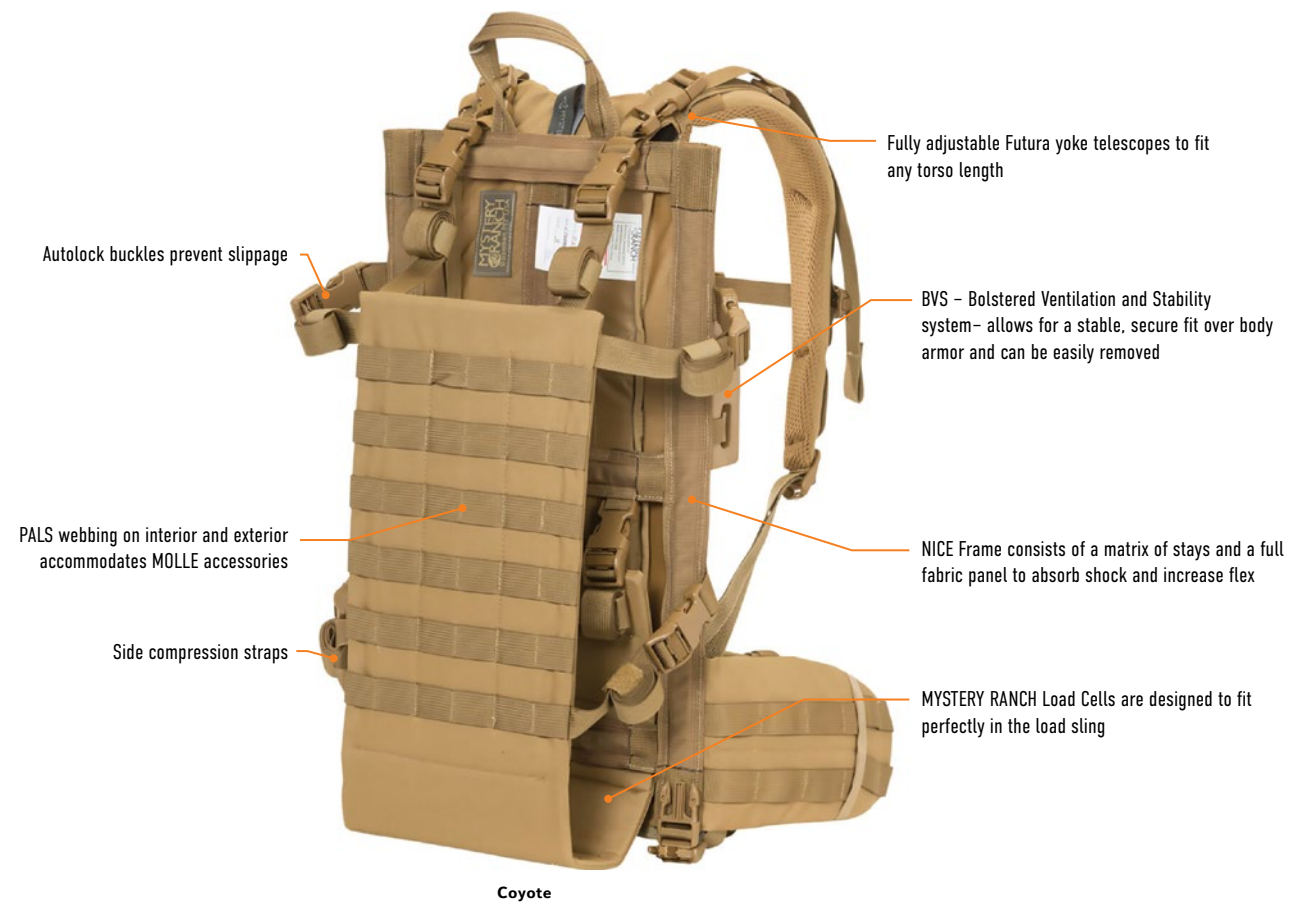

Vol: 49 L (2990 cu-in)

Size: S M L XL XXL

Berry Compliant 

The OVERLOAD® pack features the quick-access, 3-ZIP design and the ability to secure sniper and crew-served weapons or Pelican cases between the pack and frame without decreasing capacity for mission essentials or sustainment gear. Built on the NICE Frame, which is a patented construction, that allows the frame to flex with your body resulting in top-down load transfer to comfortably carry heavy loads. The OVERLOAD® feature makes this our most advanced weapon's carry backpack.

LOAD SLING

CREWCAB

Weight: 2.5 kg (5.5 lbs)

Size: S M L XL XXL

Berry Compliant 

The LOAD SLING adds versatility and stability for non-standard loads. It is the most basic method to lash objects to the NICE Frame — a patented construction that allows the frame to flex with your body, resulting in top-down load transfer to comfortably carry heavy loads. This simple design has two adjustable straps to the top and each side. Its wide range of adjustability will conform to any load you can carry.

Weight: 3.4 kg (7.4 lbs)

Vol: 26 L (1592 cu-in)

Size: S M L XL XXL

Berry Compliant 

The CREWCAB is our variable-capacity, do-anything military pack. It can be compressed into a low-profile, 1592 cu-in pack or expanded to carry Load Cells, EOD gear, Pelican cases, robots, ammo cans, and CASEVAC in a pinch.

MEDICAL

On the front line in a medical emergency, every second counts. That's why the MYSTERY RANCH medic specific bags were designed around quick access, organization, and comfort.

[BACK TO TOP](#)

MOLE

A COMPACT AND HIGHLY FUNCTIONAL MED PACK

Designed for requirements around our winning bid in the Norwegian TCCC program, the MYSTERY RANCH MOLE fills the demand for a scaled-down, feature-rich medical pack. Every square inch of this pack was designed with function in mind. MYSTERY RANCH really stayed focused on versatility and quick access on this pack. The MOLE has already been very popular in Europe as it launches here, looks to be a consideration for your combat trauma essentials.

Check out the full line of medical military packs and accessories at:

Coyote

The main compartment splays open via one-handed access from its two-zip design, allowing full access to the removable internal pouches inside the pack. An additional, internal handle keeps from fighting the top lid when hanging the pack to work out of.

*Contents not included with MR pack.

Weight: 2.2 kg (4.9 lbs)

Vol: 22 L (1342 cu-in)

Size: S M L XL XXL

Berry Compliant

At 22L, the MOLE is similar in size, but has a slimmer profile than its popular predecessor, the RATS pack. It is built with custom spec'd 500D CORDURA® with Teflon® and PU coatings for maximum durability, UV and weather protection and finished off with IR-compliant YKK® zippers. The MOLE is highly configurable with its carrying options and internal organization, adapting to changing mission profiles.

Here's a quick video detailing the MOLE:

NICE RATS

Coyote

RATS internal organization pockets and sleeves

Multicam

Weight: 3 kg (6.6 lbs)
Vol: 23 L (1400 cu-in)
Size: S M L XL
Berry Compliant

The Rapid Access Trauma System (RATS) pack is a frontline medic bag whose every detail is focused on quick, one-handed access to organized medical supplies. There are multiple trauma shears and tourniquet holders throughout and large reinforced handles for hanging the pack on branches or inside of helicopters. It's sized so that when mounted on the NICE Frame, there is room below the pack for carrying litters or hydraulic combi tools. Inside the RATS are four removable pockets with clear vinyl windows and two IV bag pockets. The RATS also features removable BVS that optimizes the pack for use with or without body armor.

Weight: 4.4 kg (9.8 lbs)
Vol: 23 L (1400 cu-in)
Size: S M L XL XXL
Berry Compliant

The NICE RATS (Rapid Access Trauma System) pack is a frontline medic bag whose every detail is focused on quick, one-handed access to organized medical supplies. There are multiple trauma shears and tourniquet holders throughout and large reinforced handles for hanging the pack on branches or inside of helicopters. The NICE RATS is built on the NICE Frame which adds additional capacity for carrying litters or combi tools. COMMS

Modular communication pack system that can easily carry a variety of communications gear and accessories.

[BACK TO TOP](#)

COMM 4

- VELCRO® access port for antennae and cables
- IR-Compliant YKK® zippers
- Slotted sleeves on inner sides for cable management
- PALS webbing on interior and exterior accommodates MOLLE accessories
- Battery compartment fits up to four 5590 or 2590 batteries with internal cable routing to main compartment
- Autolock buckles prevent slippage
- Bottom compression straps
- Designed for use with Daypack Lid and Hitchhiker 20 accessories for sustainment gear
- Fully adjustable Futura yoke telescopes to fit any torso length
- NICE Frame consists of a matrix of stays and a full fabric panel to absorb shock and increase flex
- BVS – Bolstered Ventilation and Stability system—allows for a stable, secure fit over body armor
- VELCRO® access ports for routing cables

Available in Coyote and Multicam

Weight: 3.4 kg (7.5 lbs)

Vol: 18 L (1100 cu-in)

Size: S M L XL XXL

Berry Compliant 

The COMM 4 is a dedicated bag for your manpack radio with integrated storage for batteries and antennae. The internal radio retention straps can be configured to accommodate a range of larger format radios from 117G and 117F, as well as other systems. Interior sides are lined with fabric sleeves for cable routing. Cables can also be routed directly into the battery compartment and out ports on top and bottom of each side. Exterior has plenty of PALS webbing on front and sides to attach MOLLE accessories. Wide mouth VELCRO® opening at the top provides easy access to attached antennae and cables. The COMM 4 is built on the NICE Frame — a patented construction that allows the frame to flex with your body, resulting in top-down load transfer to comfortably carry heavy loads.

Size: S M L XL XXL

Berry Compliant 

The MYSTERY RANCH Jump Pack line was developed several years ago working closely with the MFF community. The JUMP OVERLOAD our most advanced weapons carry backpack made jumpable and based on the NICE Frame. This pack is unique for its ability to change from Patrol pack to weapons carry to load hauler. In default configuration, it is a fast access, 2,990 cu-in Patrol pack. When missions change, it securely transports sniper and crew-served weapons or Pelican cases between the pack and frame without decreasing capacity for mission essentials or sustainment gear. When it's time for resupply or you have to haul large, awkward items, simply expand the cargo shelf and you have massive load-carrying capability. MYSTERY RANCH has always focused on making packs that carry well first and foremost, then balance between lightweight and durability relative to the end users' needs. The Jump Packs are constructed so they carry weight just like their non-jump counterparts, with only a 4 oz weight penalty.

Weight: 3.7 kg (8.2 lbs)

Vol: 86 L (5248 cu-in)

Size: S M L XL XXL

Berry Compliant 

The MYSTERY RANCH Jump Pack line was developed several years ago working closely with the MFF community and the JUMP MOUNTAIN RUCK is the largest in our line-up of Jump Packs. This pack is our interpretation of the classic military ALICE pack design made jumpable. It combines the desirable shape of the original with the superior fit, quality and function of a MYSTERY RANCH product. The outside pockets keep gear separated and organized and the interior has PALS webbing on the back panel for attaching MOLLE accessories. MYSTERY RANCH has always focused on making packs that carry well first and foremost, then balance between lightweight and durability relative to the end users' needs. The MISSION DUFFELS' design is honed from MYSTERY RANCH's expertise in organized carry. The horseshoe-shaped zippered access provides easy access to the guts of the duffel. Multiple pocketing, including an exterior access boot compartment and side pocket, allow for organized travel. Rugged fabrics provide ample water-resistance. And the multiple carrying configurations will make these duffels your number one travel companion.

Weight: 1.3 kg (2.8 lbs)
Vol: 21 L (1281 cu-in)
Size: One Size

Berry Compliant

Be prepared for life's daily battles with the URBAN ASSAULT 21. The 3-ZIP design serves both form and function, allowing ready access to your pack's contents. With built-in laptop and tablet sleeves, your devices are protected. It features a zippered, mesh-lined pocket built into the lid, as well as two internal zippered pockets to organize smaller items.

ACCESSORIES

MYSTERY RANCH accessories were designed to help customize your pack whether quick access to essentials, extra volume, additional organization, or hydration solutions.

Color: Coyote | Multicam | Black

O.E.M

One of the things we are thankful for at The Ranch is the interesting problems our customers bring to us. That includes packaging weapons, comm gear, optics, sensors, connectors, and cabling. We have designed built-in systems to carry jammers, receivers, and robots. If it needs to be carried by a human - let's talk.

FRAMES

NICE Frame

A rigid yet dynamic frame system that moves with you. The NICE frame consists of three vertical and three horizontal carbon fiber stays and a full fabric panel between the stays that absorbs shock and increases the flexibility of the frame. This patented construction allows the frame to flex with your body, resulting in top-down load transfer to comfortably carry heavy loads. This frame system incorporates our patented Futura Yoke system which enables you to micro adjust the torso length and is a crucial piece of the structure of the pack.

Internal Frame

The Internal Frame consists of composite stays and an HDPE (high-density polyethylene) sheet that provides rigidity yet is flexible. This frame system incorporates our patented Futura Yoke system which enables you to micro adjust the torso length and is a crucial piece of the structure of the pack.

Frame Sheet

The HDPE (high-density polyethylene) sheet provides rigidity yet is flexible. This frame system incorporates our patented Futura Yoke system which enables you to micro adjust the torso length and is a crucial piece of the structure of the pack.

Military Light Frame

The MLF consists of four vertical and three horizontal carbon fiber stays and a reduced fabric panel using stiffer, more structured CORDURA® Dyneema laminate at the points of connection resulting in shock absorption and increase in the flexibility of the frame. This frame system incorporates our patented Futura Yoke system which enables you to micro adjust the torso length and is a crucial piece of the structure of the pack.
