LOST ARROW PROJECT®

**We create special-purpose
clothing solutions for
extreme environments by
leveraging Patagonia's deep
experience in performance
materials, functional
innovation, technical design
and precision manufacturing.**

U.S. MADE - BERRY COMPLIANT

AVAILABLE FOR FEDERAL AND DEFENSE CONTRACTING ONLY.

MARS

COLD WEATHER UNIFORM SYSTEM

The MARS (Military Alpine Recce System) is a dynamic cold-weather clothing system that is engineered to extend mission duration and operational reach using airflow control to manage heat and moisture. MARS offers increased capability at the lightest weight, ensures fewer items to carry and requires minimal in-field clothing adjustments to manage.

AIR

A suite of products for PERFORMANCE and RANGE that enable you to regulate your personal micro-climate and extend operational reach in mild to extremely cold conditions.

Next-to-Skin

Products that are designed to be worn next-to-skin and utilize wool for its inherently superior properties: moisture management, odor resistance and thermoregulation.

Flex

FLEX products offer maximum versatility with a spectrum of super air-permeable insulation solutions designed to dump excess heat and shed wind, snow and light precipitation. FLEX products can be worn alone or combined with other items in the MARS system.

Air Shell

Hybrid and waterproof SHELLS that use air permeability to manage excess heat and moisture during moderate to high levels of activity in inclement weather.

STORM

The ultimate products for SURVIVAL and DURATION that protect you when extreme weather conditions demand the cessation of activities and you require airflow shutdown to maintain vital warmth.

Storm Shell

Windproof and waterproof products that reduce airflow to an absolute minimum for severe weather situations.

Thermal

Extra thermal insulation for low output/stationary situations in extremely cold environments.

LW (Lightweight) Wool Boxer Briefs

#19369

AIR 

FATIGUE GREEN

FORGE GREY

Description

- NTS (next-to-skin) boxer briefs made from a lightweight, naturally antimicrobial/odor-resistant, FR wool blend that manages moisture for superior comfort during extended-duration missions
- Use NTS as the foundation of any MARS cold-weather system. Combine with AIR products to optimize airflow control to shed excess heat and moisture during medium- to high-output activity. Can also be combined with STORM products during static situations that require airflow shutdown and warmth maintenance

Materials

- 100% US-sourced FR Lenzing™/wool/nylon blend
- 4.8 oz/sq yd (163 g/sq m)

Product Features

- Knee length
- Manages moisture, dries quickly and resists odor
- Low-bulk seam construction for next-to-skin comfort

Weight *Spec weight of size Large*

- 94 g (3.3 oz)

Contracting Standards

- Product meets Berry Amendment standards (U.S.C., Title 10, Section 2533a)

Country of Origin:

- USA Made

Sizes

NTS (NEXT-TO-SKIN)

LW (Lightweight) Wool Tech Tee

#19333 REGULAR | #19358 LONG

AIR 

FATIGUE GREEN

FORGE GREY

Description

- NTS (next-to-skin) short-sleeved shirt made from a lightweight, naturally antimicrobial/odor-resistant, FR wool blend that manages moisture for superior comfort during extended-duration missions
- Use NTS as the foundation of any MARS cold-weather system. Combine with AIR products to optimize airflow control to shed excess heat and moisture during medium- to high-output activity. Can also be combined with STORM products during static situations that require airflow shutdown and warmth maintenance

Materials

- 100% US-sourced FR Lenzing™/wool/nylon blend
- 4.8 oz/sq yd (163 g/sq m)

Product Features

- Manages moisture, dries quickly and resists odor
- Low-bulk seam construction for next-to-skin comfort

Weight *Spec weight of size Large*

- 157 g (5.5 oz)

Contracting Standards

- Product meets Berry Amendment standards (U.S.C., Title 10, Section 2533a)

Country of Origin:

- USA Made

NTS (NEXT-TO-SKIN)

LW (Lightweight) Wool Crew

#19332 REGULAR | #19357 LONG

AIR 

FATIGUE GREEN

FORGE GREY

Description

- NTS (next-to-skin) long-sleeved shirt made from a lightweight, naturally antimicrobial/odor-resistant, FR wool blend that manages moisture for superior comfort during extended-duration missions
- Use NTS as the foundation of any MARS cold-weather system. Combine with AIR products to optimize airflow control to shed excess heat and moisture during medium- to high-output activity. Can also be combined with STORM products during static situations that require airflow shutdown and warmth maintenance

Materials

- 100% US-sourced FR Lenzing™/wool/nylon blend
- 4.8 oz/sq yd (163 g/sq m)

Product Features

- Manages moisture, dries quickly and resists odor
- Low-bulk seam construction for next-to-skin comfort
- Long-sleeved for warmth in colder conditions
- Thumb loops keep sleeves in place

Weight *Spec weight of size Large*

- 199 g (7 oz)

Contracting Standards

- Product meets Berry Amendment standards (U.S.C., Title 10, Section 2533a)

MW (Midweight) Wool Zip-Neck

#19301 REGULAR | #19338 LONG

AIR 

FATIGUE GREEN

FORGE GREY

Description

- NTS (next-to-skin) zip-neck shirt made from a midweight, naturally antimicrobial/odor-resistant, FR wool blend that manages moisture for superior comfort during extended-duration missions
- Use NTS as the foundation of any MARS cold-weather system. Combine with AIR products to optimize airflow control to shed excess heat and moisture during medium- to high-output activity. Can also be combined with STORM products during static situations that require airflow shutdown and warmth maintenance

Materials

- 100% US-sourced FR Lenzing™/wool/nylon blend
- 7.1 oz/sq yd (241 g/sq m)

Product Features

- Manages moisture, dries quickly and resists odor
- Low-bulk seam construction for next-to-skin comfort
- Long-sleeved for warmth in colder conditions
- Collar provides protection from cold, chafing and UV exposure
- Zip-neck allows for ventilation
- Thumb loops keep sleeves in place

Weight *Spec weight of size Large*

- 348 g (12.2 oz)

Contracting Standards

- Product meets Berry Amendment standards (U.S.C., Title 10, Section 2533a)

Country of Origin:

- USA Made

Dasher Jacket

#19317 REGULAR | #19348 LONG

AIR 

FATIGUE GREEN

FORGE GREY

MULTICAM

Description

- Extremely versatile, air-permeable wind shell that provides warmth and wind resistance while shedding moisture and heat buildup for superior comfort during high-output activities in warm to cool, variable weather conditions
- Use as a water-resistant shell over NTS (next-to-skin) products to minimize wind chill when you are on the move
- Lightweight and extremely packable

Materials

- 100% textured nylon with a DWR (durable water repellent) finish
- 1.5 oz/sq yd (51 g/sq m)

Product Features

- Full-zip for easy layering
- Designed for full-range movement
- Chest pocket
- Simple elastic wrist cuffs and back hem eliminate cord management

Weight *Spec weight of size Large*

- 139 g (4.8 oz)

Contracting Standards

- Product meets Berry Amendment standards (U.S.C., Title 10, Section 2533a)
- Multicam colorway meets NIR compliance standards

Country of Origin:

- USA Made

Sizes

Pneumo Fuse Jacket

#19310 REGULAR | #19341 LONG

AIR 

FATIGUE GREEN

FORGE GREY

MULTICAM

Description

- Air-permeable, light-thermal FLEX shell that keeps you warm and comfortable during high-output activities in cool to cold weather by shedding excess moisture and heat buildup
- Use with NTS (next-to-skin) products as a light shell; can also function as a light thermal layer with an AIR SHELL that uses airflow control to maintain comfort and performance
- Lightweight and extremely packable

Materials

- Shell A: mechanical stretch grid 100% nylon fleece laminate with a DWR (durable water repellent) finish
- Shell B: 100% textured nylon with a DWR finish
- Lining: high efficiency, blended polyester/spandex (30% recycled) grid fleece
- Cuffs: nylon/spandex stretch double weave

Product Features

- Ultrasonically welded ForgeLine™ construction with zero-bulk seams
- Composite construction:
 - Laminated panels for superior abrasion and wear resistance
 - Two-layer panel construction for a reduced acoustic signature
- Full-zip for easy layering
- Designed for full-range movement
- Two front pockets
- One chest pocket
- Stretch-woven wrist cuffs for low bulk
- Stretch-woven back-hem band for low bulk

Weight *Spec weight of size Large*

- 415 g (14.6 oz)

Contracting Standards

- Product meets Berry Amendment standards (U.S.C., Title 10, Section 2533a)
- Multicam colorway meets NIR compliance standards

Pneumo Fuse Pants

#19373 REGULAR | #19374 LONG

AIR 

FATIGUE GREEN

FORGE GREY

MULTICAM

Description

- Air-permeable, light-thermal FLEX pants that keep you warm and comfortable during high-output activities in cool to cold weather by shedding excess moisture and heat buildup
- Combine with NTS (next-to-skin) products to tailor a mission-appropriate uniform system that uses airflow control to maintain comfort and performance
- Lightweight and extremely packable

Materials

- Shell A: mechanical stretch grid 100% nylon fleece laminate with a DWR (durable water repellent) finish
- Shell B: 100% textured nylon with a DWR finish
- Lining: high efficiency, blended polyester/spandex (30% recycled) grid fleece

Product Features

- Ultrasonically welded ForgeLine™ construction with zero-bulk seams
- Laminated panels for superior abrasion and wear resistance
- Pull-on pants with internal soft tie at the waistband
- Designed for full-range movement
- Stretch-woven gusseted crotch
- Two front pockets
- Streamlined cargo pocket on each thigh
- Elastic cord in the cuffs enables full closing of the cuff opening
- No-bulk belt loops accommodate a military-spec rigger's belt

Weight *Spec weight of size Large*

- 322 g (11.3 oz)

Contracting Standards

- Product meets Berry Amendment standards (U.S.C., Title 10, Section 2533a)
- Multicam colorway meets NIR compliance standards

US Nano-Air® Vest

#19379 REGULAR | #19380 LONG

AIR 

FATIGUE GREEN

FORGE GREY

MULTICAM

Description

- Air-permeable, mid-thermal FLEX vest with “warm even when wet” FullRange® insulation that sheds excess body heat and moisture buildup during high aerobic output; features a DWR (durable water repellent) finish
- Combine with NTS (next-to-skin) products to create an airflow control system for cold to freezing conditions that requires fewer layering adjustments
- Lightweight and extremely packable

Materials

- Shell: 100% textured nylon with a DWR (durable water repellent) finish
- Insulation: 2-oz FullRange® polyester/acrylic blend
- Lining: 100% polyester

Product Features

- Full front-zip for easy layering
- Two insulated front pockets
- Two chest pockets
- Two internal mesh pockets
- Simple elastic internal hem gathers to eliminate bulk

Weight *Spec weight of size Large*

- 293 g (10.3 oz)

Contracting Standards

- Product meets Berry Amendment standards (U.S.C., Title 10, Section 2533a)
- Multicam colorway meets NIR compliance standards

US Nano-Air® Hoody

#19375 REGULAR | #19376 LONG

AIR 

Description

- Air-permeable, mid-thermal FLEX shell with “warm even when wet” FullRange® insulation that sheds excess body heat and moisture buildup during high aerobic output; features a DWR (durable water repellent) finish
- Combine with NTS (next-to-skin) products to create an airflow control system for cold to freezing conditions that requires fewer layering adjustments
- Lightweight and extremely packable

Materials

- Shell: 100% textured nylon with a DWR (durable water repellent) finish
- Insulation: 2-oz FullRange® polyester/acrylic blend
- Lining: 100% polyester

Product Features

- Helmet-compatible hood; integrated elastic tensioners eliminate dangling cords
- Full front-zip for easy layering
- Designed for full-range movement
- Two insulated front pockets
- Two chest pockets
- Two internal mesh pockets
- Stretch-woven wrist cuffs for low bulk
- Touch Point System® embedded hem cord locks with internal front-pocket adjustment

Weight *Spec weight of size Large*

- 484 g (17 oz)

AIR 

FORGE GREY

FATIGUE GREEN

MULTICAM

Description

- Air-permeable hybrid-construction AIR SHELL with stretch-woven panels that shed excess heat and moisture buildup during high aerobic output in variable conditions
- Strategically mapped 3-layer H₂No® AIR waterproof panels eliminate water penetration in key locations
- Use with NTS (next-to-skin) and FLEX combinations for increased protection in adverse weather conditions

Materials

- Shell: 3-layer waterproof/air-permeable H₂No® AIR Performance Standard fabric with a DWR (durable water repellent) finish
- Stretch Body: polyester/lycra blend (30% recycled) stretch-woven fabric

Product Features

- Helmet-compatible hood with dual-adjustment shock cords (concealed)
- Hook-and-loop wrist closures
- Two zippered front hand pockets
- One zippered chest pocket (external)
- Touch Point System® embedded cord locks (hem and hood)
- Hem cord adjusts into the front pockets
- Designed for full-range movement
- All cords concealed to eliminate snag

Weight *Spec weight of size Large*

Vapor Fuse Jacket

#19320 REGULAR | #19351 LONG

AIR 

FATIGUE GREEN

FORGE GREY

MULTICAM

Description

- Waterproof/air-permeable AIR SHELL jacket with 3-layer H₂No[®] AIR Performance Standard construction that sheds excess heat and moisture buildup during high aerobic output in extremely inclement weather
- Use with NTS (next-to-skin) and/or FLEX combinations to create a cold-weather uniform system that uses airflow control to maintain comfort while providing increased protection from heavy weather
- Lightweight and extremely packable

Materials

- 3-layer H₂No[®] AIR waterproof/air-permeable Performance Standard fabric with a DWR (durable water repellent) finish

Product Features

- Ultrasonically welded ForgeLine™ construction reduces weight and bulk
- Skinny seam tape improves breathability and reduces weight and bulk
- Smooth backer construction for friction-free layering
- Helmet-compatible hood with dual-adjustment shock cords (concealed)
- Touch Point System[®] embedded cord locks (hem and hood)
- All cords concealed to eliminate snagging
- Elastic wrist closures
- Designed for full-range movement
- One zippered chest pocket (internal)

Weight *Spec weight of size Large*

- 325 g (11.4 oz)

STORM

FATIGUE GREEN

FORGE GREY

MULTICAM

Description

- 100% windproof THERMAL parka with a DWR (durable water repellent) finish and maximum high-loft FullRange® insulation that preserves critical body heat even when wet; designed for long-duration static events in extremely cold environments
- Use on top of any product configuration for survival in stationary or low-output situations (FullRange insulation can be walked dry in an emergency)
- Lightweight and extremely packable

Materials

- Shell: 100% textured nylon with a DWR (durable water repellent) finish
- Insulation: Strategically mapped 2.0 and 3.5-oz FullRange® polyester/acrylic blend
- Lining: 100% polyester

Product Features

- Helmet-compatible hood with elastic gather and single shock cord (concealed)
- Two zippered insulated front hand pockets
- Two zippered pass-through size pockets for internal access or ventilation; internal hanger clips for arctic gloves
- Two internal drop-in pockets

- Touch Point System® embedded cord locks (hood and hem)
- Hem cord adjusts into the front pockets
- All cords concealed to eliminate snagging
- Full front-zip for easy layering
- Designed for full-range movement
- Elastic cuffs can layer over gloves or under gauntlet-style gloves

3S

3 SEASON PERFORMANCE UNIFORM

The 3S (3 Season) Performance Uniform System is a singular technical-combat uniform that enables operational performance and comfort across maritime, arid, jungle and subalpine environments.

3S Combat Field Shirt

#19401 REGULAR | #19405 LONG

MULTICAM

FATIGUE GREEN

FORGE GREY

Description

- Lightweight yet durable technical ops top built for athletic comfort, mobility and performance across multiple environments: maritime, jungle, desert, temperate and subalpine
- Made from a highly breathable, quick-drying, nylon stretch-woven fabric that allows for minimal gear adjustments in transitional environments

Materials

- Quick-drying, balanced 4-oz nylon stretch-woven performance fabric

Product Features

- Hybrid mandarin collar can be worn open for a garrison uniform look, or closed as a neck protector for operational applications
- Underarm gussets for maximum range of motion
- Innovative low-bulk, inset chest pockets with drainage
- Internal catch-flap with hook-and-loop closure
- Two streamlined, low-profile, inset sleeve pockets with zipper closures
- NIR-compliant printed loop patch on upper arm
- Reinforced bar-button closures at cuffs allow sleeves-up or sleeves-down configurations
