

Self Resetting Target SRT-3000

Specifications:

Performance Specifications:

Lift Capacity: Up to a 16in silhouette.

Lift/Reset Time: Less than 3 seconds

Physical Specifications:

Dimensions: 15in L, 9in W, 10in H
*not including silhouette

Weight: ~60 lbs

Environmental Specifications:

Storage Temp: -40F to 140F
(-40C to 60C)

Operating Temp: -20F to 120F
(-28C to 49C)

Weather Resistance: Wind/Rain resistant.
Non-submersible

Electrical Specifications:

AC Voltage: 120VAC to 12VDC
750W power supply.

Strategic Systems Inc. Self Resetting Target (SRT-3000) device is a larger version of the revolutionary SRT-1000 Self Resetting target for live fire training. The unit lifts a variety of head-plate silhouettes up to 30 lbs. 12" to 14" round plates and up to 16" man-shaped AR500 steel plates.

The target may be used with a variety of calibers from 9mm to .308 Recommended stand-off distance for pistol is >15M or >30M for rifle.

Long lasting AR500 steel headplate can be easily replaced if/when it finally becomes deformed. Simple one-button operation gets you shooting in no time with audible/visual report of hits but simple and efficient resetting motor saves down-range recock time.

Practice the 4 Rules.

A variety of AR500 steel plates are available for use with the SRT-3000. Simple replacement and adjustment allows for quick change of plates to spend more time shooting and less time recocking the range.

SRT-3000 may be powered individually with 12VDC battery, or by 120VAC to 12VDC power supply for individual targets or grouped plate racks as seen in the photo above.

Target systems can be customized for new or retrofitted ranges to electronically control the delay before resetting the targets.

1. ASSUME ALL GUNS ARE ALWAYS LOADED
2. NEVER POINT A GUN AT ANYTHING YOU ARE NOT WILLING TO DESTROY
3. KEEP YOUR FINGER OFF THE TRIGGER UNTIL YOU ARE READY TO FIRE
4. BE AWARE OF YOUR TARGET AND WHAT IS BEHIND IT
