

Description:

The X-TLD Series is a variant of the standard TLD used in the Range In A Box [RIAB] system.

The X-TLD offers several advantages to get training faster. Everything about the X-TLD has been developed for simplicity:

Less hardware to deploy.
Quick swap, long lasting, common cordless tool battery. Up to two days runtime with 6Ah battery.

Simple, rechargeable, hand-held controller.
Adjust target options on-the-fly with the pocket size controller. Stores last used settings in memory.

Best lift capability in a light-weight target system on the market. Same lift mechanism as our popular RIAB TLD series.
Effective wireless range: 500+ meters LOS

Tool-less connection of silhouettes and accessories.
Budget friendly. Less hardware means less expense.
Quicker to deploy. Lower cost. Same rock-solid target lifter hardware.
