UTS OVERVIEW

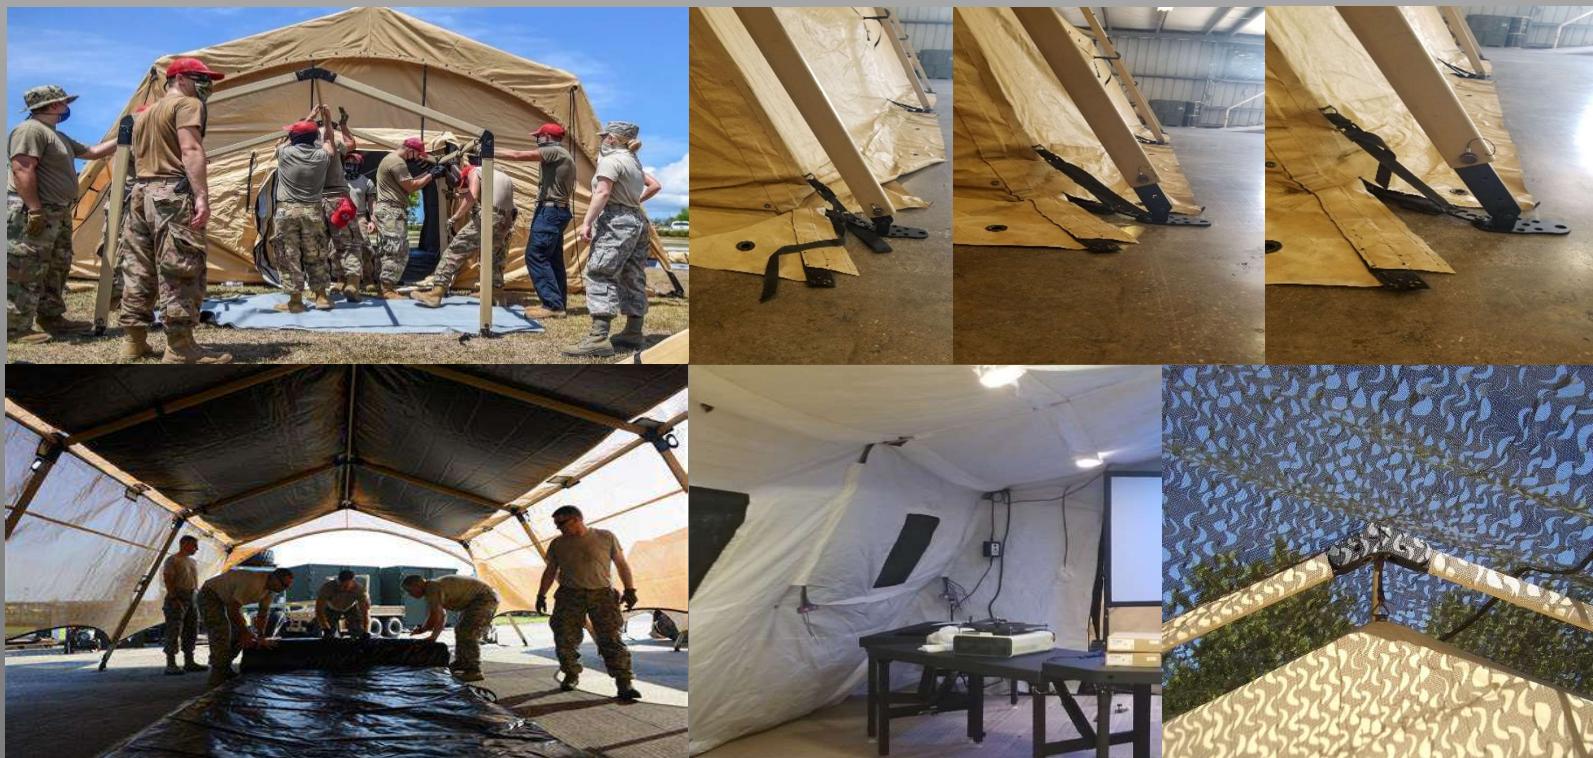

- UTS Systems is a small business based in Ft Walton Beach, FL where we manufacture and integrate several product lines of quick erect, tactical shelter systems and similar expeditionary assets;
 - TM shelters – 19'W modular / 200sq' – 850sq'
 - TM Tall shelters – 21'W modular 420sq'– 924sq'
 - TXL shelters – 30'W modular / 480sq' – Exponential
 - CBRN “Single Skin” shelter systems – Chem Protected
 - Field Hospitals – Medical Equipment Integration
 - Command & Control/TOC's/TAC's-complete systems
 - Personnel Decon shelter systems – 2/3/4 Lane
 - Mobile power generation/ECU equip – XGT30-5
 - Expeditionary field shower/sanitation systems
 - Shipping container/shelter hybrid systems
 - Customizable base camps – 100-1k troops

UTS SHELTER ADVANTAGES

- **Quick set up time—under 15 min w/ only 3-6 people**
- **Setup without power, handling equip or ladders**
- **Extremely strong frame w/solid alum components**
- **Simple and intuitive, reduced training & maint costs**
- **Compact, tactical, excellent man-portability**
- **Pre-installed electrical/Cat 6/LED Lights—leave in**
- **Energy efficient Thermal Fly >25% most efficient tent**
- **No snag points – easy camouflage deployment**
- **Adjustable feet to accommodate for uneven terrain**
- **Boots available for integration with common equip**
- **Minimal PPE required**

UTS FRAME CONSTRUCTION

Premium Frame Quality

- High quality, highly durable frame
- Aircraft grade T6061 aluminium
- Frame joints machined from solid aluminium block for optimum strength
- Stainless steel mechanical fittings and frame components
- Intuitive setup and teardown
- No tools and no work-at-height

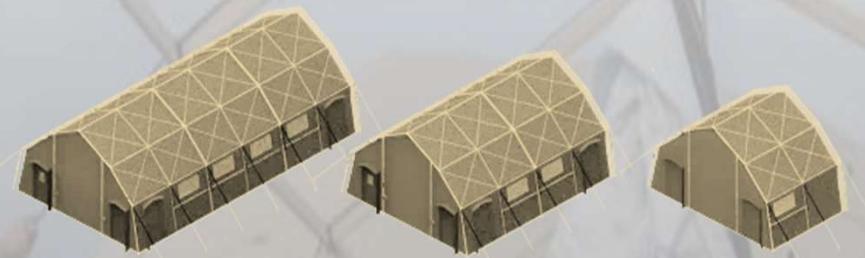

UTS SHELTER MODELS

- Multiple Shelter Families, Cross-compatible
- Uniform connection interfaces
- Common deployment principle, storage and movement
- Component Commonality

UTS Thermal Fly

*Comes Standard with each Shelter

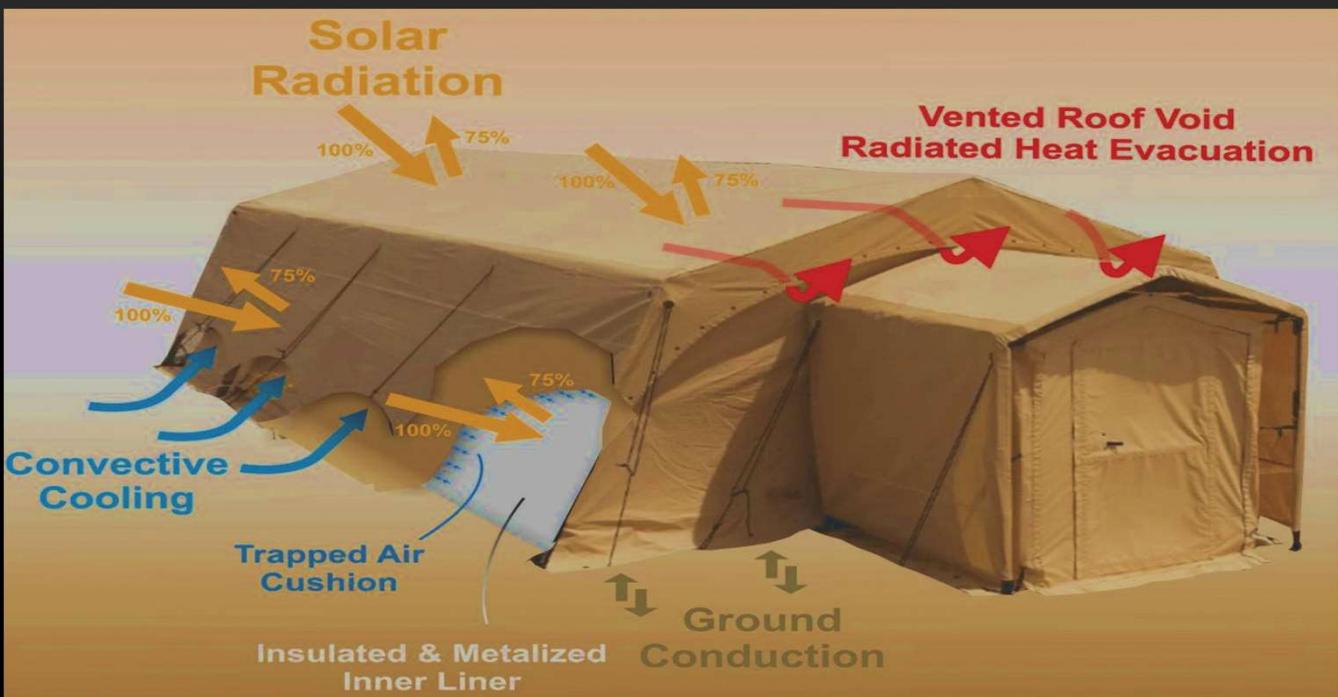

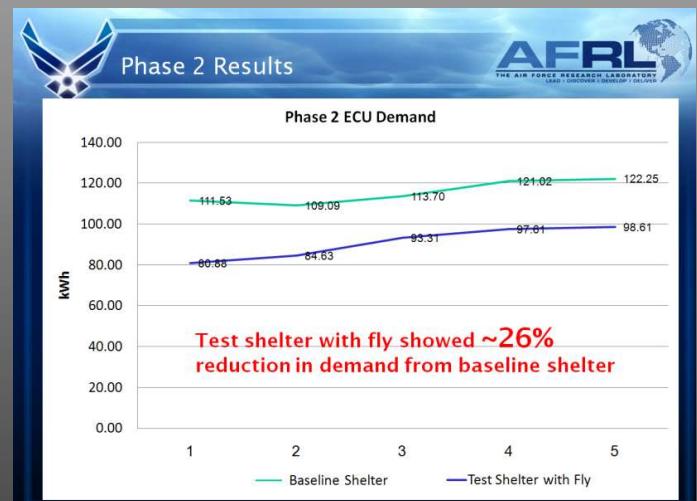

Part I – Energy Efficiency

-Reduces ECU power consumption by 26% as tested by Air Force Research Lab (AFRL) = burn less generator fuel, less BTUs required =reduce # of re-fuels/equip PM/# of deployed field techs

- Radiant barrier (internal liner) provides refracting & dissipation of solar loading to reduce heat transfer from outside ambient to internal conditioned space

- Achieved +40deg Delta w/ [1] 5-ton ECU on (2) TM60 650 ft² shelters/Ali Al Salem, Kuwait, 2013

UTS Thermal Fly

*Comes Standard with each Shelter

Part II – Added Protection

Extends Shelter Life

-Shields main shelter body from harsh environmental conditions - sand, wind, UV degradation etc

Shelter Strength

-Shelter Strength - Thermal Fly is deployed on top of the shelter frame - External frame = quick erect set up w/ internal frame strength

Versatile

-Can be deployed during initial set up or after as sustainment piece

-Can be used standalone w/ frame for instant overhead cover

Mil-Std Testing

ATC TOP 10-2-75

Tents and Shelters Mil Std Testing Aberdeen Proving Grounds, MD

- Snow Load = 10 lbs per sq'
- Wind Load = 55-65 mph
- Rain Intrusion = 2" per hr
- Durability = 50ea Erect/Strike
- Blackout = 100M/300M w NVG's

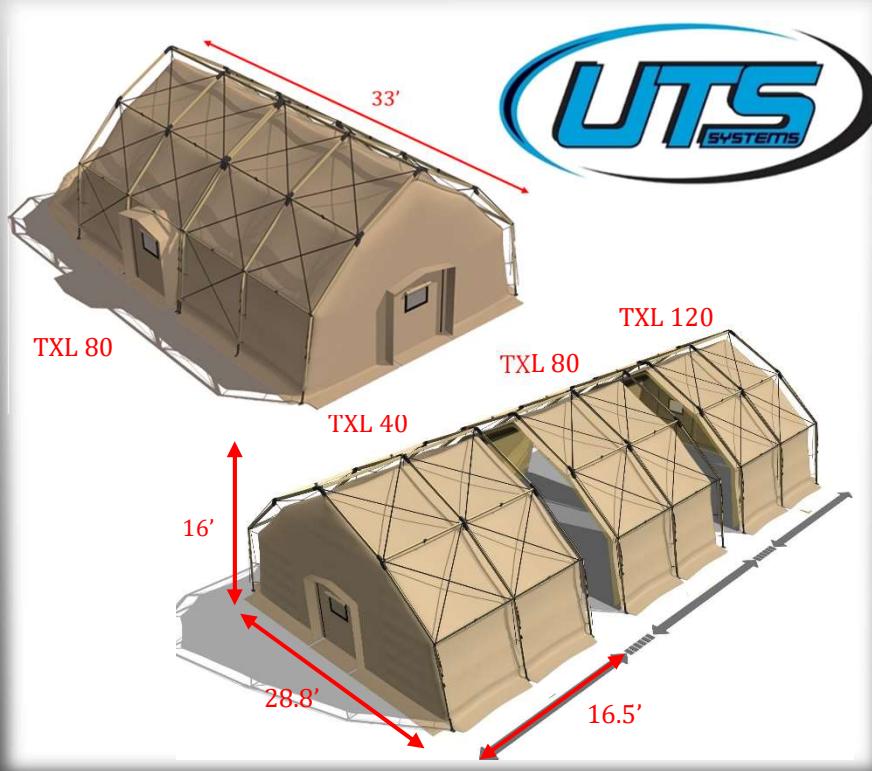

*Tested both with and without Thermal Fly

UTS Systems TXL Shelter

Applications

- Tactical Operation Centers
- Vehicles Maintenance
- Billeting Accommodations
- Dining Facilities
- Unmanned Aerial Vehicles

Key Features

- TXL80 (920 ft^2) shelter can be erected in less than 30 min by five (5) personnel
- Integrated Thermal Fly to reduce solar load
- Extremely durable folding frame design
- No power, compressors or even a ladder required for the set-up or tear down
- System comes in man-portable carry bags
- Intuitive design simplifies training

XGT30-5/8-Ton

Expeditionary Trailer Mounted Generator/ECU

Generator Specs

- 30kW, 120/208V, 3Ph, 60Hz
- Tier 4 Interim Engine
- Diesel/JP8 fuel source
- 50gal internal fuel tank
 - Aux fuel connections
- 65 dB @ 25ft
- Service Access Panels
 - External oil & coolant drains
- 2ea 60A / 2ea 20A outputs

ECU Specs

- 60k BTU, 5-ton cooling capacity
 - 96k BTU, 8-ton optional
- 18kW electric heat
- Scroll compressor/R-407C refer
- 1800 CFM
- Simple electronic controls

Trailer Specs

- HMMWV-towable
- UTS shelter stowage platform
- 4 large storage compartments
- Run-flat mil-spec tires
- 3620 lbs – total system weight

Turn-key Deployment Packages

100 Person Bed Down Pkgs

- Billeting Shelters
- Cots/Bunks
- Shower/Shave facilities
- Expeditionary Latrines
- Environmental Control
- Mil Std Power Generation
- Housekeeping Equipment

TOC/TAC/C2 Pkgs

- Command Shelter
- Audio/Visual Equip
- 120V-CAT5/6 wired Workstations
- Environmental Control
- Mil Std Power Generation
- Housekeeping Equipment

Field Hospital

- Deployable Field Hospital/Clinic shelters
- Full modular customization
- USAF EMEDS +25 bed
- USAF ERPSS
- USAF HRT
- USA Role I, II, III

TOC/TAC/C2

BN/BDE/DIV TOC packages

- Multiple Screens on single TV/Projector Rack, fully integrated
- Full up Commo systems
- Customization Available

Mass Personnel DECON System

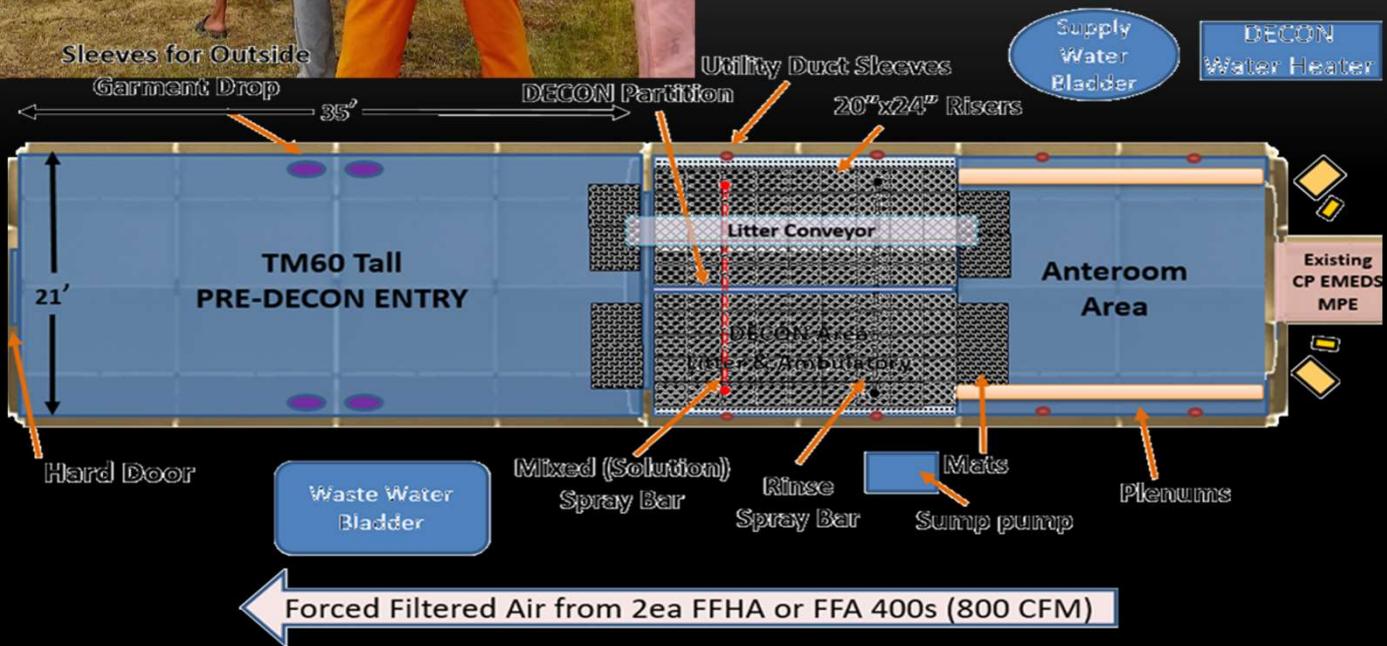

UTS DECON System

- TM Tall shelters for main body
- DECON Water Heater
- 3k Supply & Waste Bladders
- Double Entry Hard Doors
- Sleeved Garment Drops
- Hard Flooring System
- Aluminum Shipping Containers

Layout

- Configurable to Specific Req's
- Multi-Lane Options
- Ambulatory/Non-Ambulatory

Complexing/Layout

Flexibility

- Connect multiple UTS shelters together
- Connect UTS to other Mil shelters
- Connect Vehicles/Containers

Addtl Capabilities

Shelter Support Equip

- Shelter Interior Lighting
 - Fluorescent/LED tube lights w/ blackout
 - Integrated LED lights w/blackout
- Electrical/Power Distribution Boxes
 - 30A/60A/100A/200A/400A/800A
- Environmental Control Unit (ECU)
 - 3-ton/5-ton/8-ton
- Power Generation Units
 - 3kW/5kW/30kW/60kW

Shelter Accessory Equip

- Interior Divider Walls
- Interior Patricians
- Hanging Rigid Bar
- Analog Map Board
- 4 Person Litter Rack
- Shelter/Vehicle Mount

Packability/Portability

Man-Portable

-Each Shelter packs into 5ea man-portable carry bags w/ handles

Shipping/Storage Containers

- French Doors front load
- Inside load securing straps
- 4ea per 463L pallet
- No Heavy Equip manpower only;
bottom unload with top packed

- EAC90 (88"x108"x96")
 - 8ea TM36 (400sq') per 90
 - 6ea TM54 (550sq') per 90
 - 6ea TM60 (650sq') per 90
 - *5ea TM75 (800sq') per 90
- *Pictured above

Field Training & Support

New Equipment Training

- On-site training upon delivery
- Included with initial purchase
- Coordinated by your local UTS Field Service Technician

Field Expertise

Expert Field Training by retired/former military UTS field technicians

Whole package TOC/TAC training includes:

- Individual shelter training
- Complexing multiple UTS shelters
- Operational fit test/new or legacy gear

Demo/Exercise Support

- Contact UTS for Onsite Demo and operational fit test
- Test UTS equipment during an exercise - no commitment to buy!
- Customized TOC/TAC layout with legacy or new A/V components

UTS COMMITMENT to EXCELLENCE

- OUR COMMITMENT

UTS Systems is a small, veteran owned, expeditionary shelter company that manufactures a complete line of rapidly deployable shelters. UTS shelters incorporate a patented state-of-the-art folding frame design that can be consistently erected in under 10 minutes. UTS shelters are built for a variety of applications in the most extreme environments. The simple shelter design is considered by users to be the latest advance in shelters as durability is not compromised to achieve a rapid and repeatable set-up / tear down and doesn't require power, an air-compressor, special tools or even a ladder, ever.

- WARRANTY INFO

UTS Systems offers a three-year warranty on our shelters. UTS Systems will repair or replace any shelter component that fails due to faulty materials or workmanship. Bent or otherwise damaged frame pieces, frayed ropes and rips or tears in fabric are considered normal wear and tear. **UTS Systems reserves the right to extend the warranty service program, decided on case by case situations.**

- DEMO / SERVICE

UTS offers at location, no commitment demos to give our customers the right to see firsthand how simple and strong our shelters are prior to purchasing. Our retired/former US Military field experts will work with you from defining your requirement to fielding your UTS shelters. New Equipment training and reoccurring training are included with your purchase. We are available by phone 24/7 and support is never an additional cost.
