

VELASEA

Velasea develops purpose-built, vertical-specific technologies for computer vision, physical security, machine learning, AI, HPC, elevated body temp screening, digital signage, and digital broadcast. From our 60k square-foot integration facility in Irvine, California, we partner with leading ISVs to manufacture custom computer appliances that have been tested and validated to suit specific requirements.

OUR EXPERTISE

Appliances

- VMS and NVR
- AI, Analytics, Computer Vision, & HPC Systems
- Workstations
- Access Control
- Digital Signage

Networking

- Switching & Routing
- Firewalls
- Wireless

Storage

- SAN
- NAS
- All Flash
- Cloud
- Hybrid

Customization

- Rack and Tower Based Systems
- Industrial/ Ruggedized

PRODUCTS

OEM

Velasea provides custom-tailored solutions using Tier 1 OEM hardware manufacturers such as Dell, Lenovo, and others. OEM solutions carry the full enterprise level support that one would expect from these brands.

Custom

From concept to prototype to scale, Velasea works alongside its customers to create the exact product to fit the list of needs. Velasea has the ability to leverage multiple customization partners to bring these innovative, outside-the-box designs to life.

Branded

Need a solution that is distinctly “yours”? Custom-branded bezels, faceplates, custom asset tags, branded boxing, user guides, and packing slips — it’s all covered. Also, since Velasea partners directly with software companies, oftentimes we’re the hardware integration arm no one knows exists.

System Design and Prototyping

Velasea has a talented team of systems engineers on staff to assist with all the phases of even the most challenging projects. From presales design/architecture to site surveys and white glove installation to long term post-implementation support, our team does it all.

COMPUTER VISION

Combined sensory data and automated intelligence - Velasea's expertise in scaling enterprise architecture (networking, edge computing, etc), coupled with leveraging digital input from cameras and sensors, creates actionable intelligence and critical environmental awareness.

Future-thinking solutions - Velasea's vision and capabilities help predict what security threats your organization will face, and how your systems can be optimized for maximum security and efficacy.

Maximized system efficiency - Build a customized architecture specific to your organization's needs and derive maximum value from your data and AI/Deep Learning systems.

About Velasea

Velasea is a full-service OEM distributor that handles highly complex integrations around physical security, retail analytics, computer vision, high performance computing, artificial intelligence (AI), digital signage and digital broadcast, on behalf of numerous technology partners and system integrators. Within its ever growing portfolio, Velasea takes initiative by also providing contract, OEM, and custom computer hardware manufacturing and configuration services. From ultra-compact to massive configurations, Velasea successfully provides solutions to challenging emerging technology problems in incredibly demanding, yet varied, environments.
