

## Product Line Overview

Vellicom Tactical's line of ruggedized displays, electronics, and accessories is engineered to support mobile command and control applications in the harshest environments. Whether you need to quickly acquire an off the shelf Expeditionary AV system, or develop a custom product for a specific application, Vellicom Tactical will work with you to support your mission.

### Product Design Philosophy

To supply the best Expeditionary AV equipment on the market our engineering team went to great lengths to ensure that all of our products are designed to be:

- Rugged and reliable to for transportation and austere remote operations
- Rapidly deployable so that your TOCs can be operational faster
- Intuitive to use so that you can focus on completing your mission

### Tactical Displays

Tactical Displays make it possible to rapidly share information and enhance situational awareness in a command and control environment. Vellicom Tactical's 4K ultra high-resolution displays are available in a variety of configurations.

Configuration options:

- Flat panel displays, short throw projectors, and video walls
- Power lift and manual deployment mechanisms
- Displays sizes ranging from 60in to 200in
- Mil-Spec aluminum and ABS transport cases

## Deployable Electronics

Vellicom Tactical's ruggedized electronic systems simplify audio and video input management in the field and enable state-of-the-art video teleconferencing.

Deployable Electronics include:

- Audio and Video Distribution Centers
- Multiview and Videowall Image Processors
- Video Teleconferencing Systems

## Operations Accessories

We offer complete TOC packages including heavy duty furnishings and other mission specific components.
