

CAPABILITY STATEMENT

Leading provider of portable tanks and dispensing equipment
Superior performance, compliance and product liability
50 years of product innovation, experience and industry knowledge
In-house engineering, design and compliance teams.

FUEL TANKS FOR GOVERNMENT APPLICATIONS

Fuel is the heart of your operation, Western Global is your partner

OUR PRODUCTS

TRANSCUBE TACTICAL

With its fully transportable design and ability to fuel up to three pieces of equipment simultaneously, a TransCube will save you time and can double or triple the run times of your equipment.

TRANSTANK TACTICAL

Offering effortless connectivity and a reduced storage footprint, a TransTank is designed to exceed expectations for fuel farms, temporary power plants and complete fueling stations.

TRANSTANK M-SERIES

The M-Series are rugged containerized fuel tanks designed and constructed for expeditious deployment.

CAPABILITY STATEMENT

DESIGNED FOR MOBILITY

Tanks can be safely lifted by crane or forklift into logistically challenging sites.

SECURITY & PEACE OF MIND

Lockable equipment cabinet protects fuel and equipment from theft and weather damage.

FASTER REFUELING

Transportable design (even when full) saves you time on-site and eliminates waiting times.

WHY WESTERN GLOBAL?

- Meets USA/ European transport and stationary fuel storage regs
- Storage for Diesel, DEF, JP8, Gasoline and Aviation Fuels
- Finished inventory and optional accessories ship quickly
- Factory and global on-site training for professional operation
- Worldwide installation services and spares support
- BAA/ TAA Compliant - Manufactured in USA and Europe
- Transport loaded with fuel 1,242 US Gal, 4,700 Litres (TransCube)
- Supplies fuel to generators and vehicle refueling at the same time
- Integrated secondary containment eliminates need for berms
- Rapid site environmental approval and same day installation

HOW TO BUY WG PRODUCTS?

- Factory direct government pricing from USA/ UK
- GSA#: 47QSWA19D00AP, Native Instinct, Llc, 8(a) SDVOSB
- GSA #: GS-07F-0207Y, John M Ellsworth Co., SB, VOSB
- Use DLA-DIBBS to place RFQs/RFPs, get quotes
- Invite WG to participate in contract vehicle
- Add WG as sub to SATOC/MATOC contract holder
- FMS (DSCA), NATO, UN, buying groups welcome
- Contact WG for list of preferred government resellers.

PAST PERFORMANCE

FEMA- US Northern Marianas, 2018

Western built and assembled 30 x 787 Gallon TransCube tanks over one weekend and had them ready for shipment in less than 24-hours per requirements of FEMA to support a typhoon response

US Army - CENTCOM Jordan, 2019

Western delivered 3x modular refueling stations designed for rapid deployments. The main fuel tank is a 2ft container holding 7k gallons of JP8 together with smaller tanks for Diesel Fuel & MOGAS. All tanks are double-wall and do not require a berm or ground preparation.

Army - CENTCOM Kuwait, 2020

Western delivered 3x modular aviation refueling stations designed for rapid deployments. The main fuel tank (20ft container), holding 5k gallons of JP8 together with a 20ft containerized pumping and filtration module. The complete system is designed to be transported by aircraft and can be moved when full of fuel.

US Army- EUCOM Black Sea Area, 2020

Western delivered 5 x MSCAT fuel tanks to support expeditionary FOB's. All tanks are double-walled, and do not require a berm or ground preparation. Ancillary equipment including pumping, filtration, generators and lighting towers were also supplied to provide a complete turnkey package.

Fluor- Niger, Africa, 2021

Western delivered a 6,700 gallon double-wall tank with a retail pump skid and fuel management system to an undisclosed military location in West Africa. The fuel management system provides input and output volumes allowing the end customer to ensure fuel accountability. This also includes access cards, which could track how much fuel specific vehicles were consuming. The system also allowed for their Project Management team in the US to monitor the base's fuel consumption and track fuel usage.

US Army - EUCOM CSCs Germany, 2021

Western delivered 10x CSC convoy refueling stations designed for rapid deployments. The main fuel tank is a 40ft container holding 16k gallons of JP8. As it is a double wall fuel tank it does not require a berm or ground preparation. Pumps are designed as trolley units which can be manually wheeled to the vehicle to be refueled. Generator, spill kit, drive-thru berms and safety equipment were provided to ensure the convoy refueling systems are able to operate autonomously. Training and after-sales support are provided by dedicated team based in Poland.

USACE - Prime Power Battalion, 2021

Western delivered 45x 525 gallon TransCube Tacticals to the US Army Corps of Engineers Prime Power Battalion. These tanks will be used as ancillary fuel tanks to power their Deployable Power Generation Distribution System.
