

## Beartooth MK II Mesh Radio

The Beartooth MK II is an ultra-lightweight self-forming mesh radio built for tactical teams that connects with your smartphone to send push-to-talk voice, text, and locations. We enable robust, secure communications when cellular connectivity is unavailable or compromised.

Beartooth transmits all of your TAK data in both a server-less and server-based environment.

Our robust mesh network meets your mission requirements and team expectations with easy setup and reliable use.

## SPECIFICATIONS

### Features

- Self-Forming and Self-Healing Mesh Network
- Two Day Battery Life
- ATAK Interface
- Low Probability of Detect, Low Probability of Intercept
- Easy Attachment to Molle Straps or Belt
- Made in USA

### Tech Specs

- Line of Sight Range of 20 Miles
- 3.7V 3,000 mAh Battery
- 1W 900 MHz FHSS Digital Transceiver
- BLE Connection to Smartphone
- AES 256 Encryption
- Supports More Than 24 Meshed Nodes
- Supports Up to 6 Hops
- 4.09 x 1.21 x 0.78 Inches without Antenna
- 12.81 x 1.21 x 0.78 Inches with Antenna
- 6.0 Ounces
