

UA-80 EVOLUTION

Underarm Constant Wear Life Vest

“Truly the next evolution in life vest design”

SWITLIK's **UA-80 Evolution Vest** is the first
FAA Approved, commercially available
constant wear life vest incorporating the
company's revolutionary underarm flotation
technology.

SWITLIK
SURVIVAL PRODUCTS

Evolutionary Underarm Flotation

- The vest moves the flotation around the wearer's chest – totally eliminating any helmet interference and allowing for an increased range of motion.
- Underarm flotation has long been known to provide benefits over the traditional yoke-style preservers. A more upright flotation attitude is much more comfortable and allows for a better field of vision and higher freeboard.

MOLLE Attachment

The Evolution Vest has more than twice (2x) the amount of available MOLLE loops than any previous Switlik design.

A variety of pockets and holsters allows for an infinite amount of customization of the vest .

Features

- Unique underarm flotation design that moves flotation around the user's body, and eliminates interference with the head and neck
- Increased MOLLE attachment space to carry more equipment
- Ergonomic Signature SWITLIK "X" Adjustment on back for superior comfort in the seated position
- Twin chamber inflatable cell with (2) oral tubes. Three layer inflation chamber design for redundancy
- YKK® QuickBurst® Breakaway zipper design
- Storage pockets for excess back strap webbing
- Heavy Duty COBRA® Quick Release Buckles (2)
- Breathable back panel with mesh spacer fabric for reduced thermal burden, extra ventilation and padding
- Protective 1000D Textured Nylon cover fabric for increased durability
- Built-in emergency locator light
- Integrated grab handle to assist in rescue or life raft boarding

Specifications

- Weight: 3.62 Lbs.
- Buoyancy: Over 80 Lbs.
- Inflation System: *Two (2) 38g CO₂ Cylinders*
- Cover Fabric: *Urethane Coated 1000D Nylon*
- Approval: TSO C13g

TSO-C13G
Approved
