

FLYBY FLIGHT GLOVE

The FlyBy glove is crafted of the highest quality Nomex®, insulation and Sensa-Touch leather. Designed specifically for aircrewmembers, this is the warmest, most functional flight glove available. The Grip System and articulated design make this flight glove a top performer.

SAFE TO FLY
USAF & NAVAIR
APPROVED

HEAT TRAP BARRIER

Lofted insulation barrier trapping in necessary heat keeping you warm at high altitudes.

TOUCH-SCREEN ACTIVE

TouchSync technology allows for seamless interfacing with the growing amount of touch-screen devices in the field.

SPECS

1-TS-FLY-CYT

1-TS-FLY-FLG

1-TS-FLY-BLK

01 GRIP SYSTEM

Our 2-part proprietary grip system increases grip by nearly 300%.

04 TOUCH-SCREEN

Permanent TouchSync micro-material is embedded into both index and thumb leathers, enabling easy operation of phones and tablets.

02 PRE-CURVED DESIGN

All our gloves are cut and sewn to compliment the natural curvature of your hand. Strategic seam placement allows for maximum comfort.

05 FIRE-RESISTANT NOMEX®

Premium DWR Nomex® self fabric for complete fire resistance surrounding the hand and wrist.

03 UTILITY SLIP POCKET

Slip pocket on top of the hand allows for added hand warmer packets to keep you warm at high altitudes. Warmth added to more warmth.
